RAJESH BISWAS

CSE Undergraduate • Competitive Programmer • Full-Stack & Systems Developer

Khulna, Bangladesh | +880 1400 234847 | rajesh18@cse.pstu.ac.bd
github.com/rajesh-1920 | rajesh-1920-dev.vercel.app | linkedin.com/in/rajesh-biswas-8b9780312
Codeforces: rajesh_1920 | LeetCode: rajesh_1920 | CodeChef: rajesh_1920

SUMMARY

Competitive programmer and CSE undergraduate with **2,000+ algorithmic problems solved** across Codeforces (**Specialist**, peak 1416), LeetCode (330+ solved, 56 Hard), and CodeChef (3★, peak 1615) — all under handle **rajesh_1920**. Two-time ICPC Regionalist and competitor in 15+ national IUPCs. Ships production-scale software on 2 paid team projects (540+ commits) and a bootable x86-64 OS kernel in C. Strong foundation in Data Structures, Algorithms, and Systems Engineering. Seeking a Software Engineering or Algorithmic Problem Solving role.

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

- **ACM ICPC Regionalist** — Two-time participant, ACM-ICPC Asia West / Dhaka Regional Onsite Contest (2024, 2025).
- **Inter-University Programming Contests (IUPCs)** — Competed onsite in **15+ national IUPCs** representing PSTU at BUET, KUET, CUET, and other venues.
- **Codeforces — Specialist** (peak **1416**): Solved **1,500+ problems** across **100+ rated contests** (handle: rajesh_1920).
- **LeetCode** — Solved **330+ problems** including **56 Hard** algorithmic challenges covering Dynamic Programming, Graph Theory, and Trees (handle: rajesh_1920).
- **CodeChef — 3★** (peak rating **1615**): Solved **280+ problems** in rated division contests (handle: rajesh_1920).
- **CSES & AtCoder** — Solved **98 core problems** on the CSES problem set (DP, Graphs, Range Queries); **320+ problems** across **28 contests** on AtCoder.
- **Intra-University Honors** — **1st Runner-up**, Intra-University Programming Contest, CSE Club, PSTU (2025); **Rising Junior Programmer**, PSTU IT Carnival (2023), and consistent top performer (2024–2026).
- **BAPS National Programming Camp** — Selected for and completed intensive intermediate algorithmic problem-solving camp at BUBT (2025).
- **2,000+ Total Problems Solved** across Codeforces, LeetCode, CodeChef, AtCoder, CSES, LightOJ, and VJudge.

TECHNICAL SKILLS

Languages	C++, C, TypeScript, JavaScript, Python, Dart, PHP, SQL, Assembly (NASM)
Algorithms & Core CS	Data Structures & Algorithms, Graph Theory, Dynamic Programming, Segment Trees, DSU, OOP, OS, DBMS
Web & Cloud	Next.js 16, Next.js 15, React 19, TypeScript 5, Node.js, Express, FastAPI, Firebase, Cloud Functions, REST APIs
Databases & Mobile	PostgreSQL, MySQL, MongoDB, Firestore, Flutter, Dart, Local Notifications
Systems & DevOps	x86-64 Kernel Dev, Limine, QEMU, Docker, Docker Compose, Git, GitHub Actions, Linux (Debian/Kali), Make

PROFESSIONAL EXPERIENCE

Software Developer — Web & Mobile

Aug 2026 – Present

Srijanee Bidyaniketan school management system • *Next.js 16, React 19, Flutter, Dart, Firebase, Turborepo*

- Top contributor on a 10-person team with **540+ commits** across the core web and mobile repositories.
- Engineered the production Flutter mobile app end-to-end (**35+ screens, 43 routes**) and large portions of the 44-route web administration console.
- Architected database-driven RBAC layer: **24 modules × 4 actions**, enforced across 95 server guards and 38 Firestore rule blocks.
- Built an idempotent payments engine settling across 3 paths (browser return, signed IPN, reconciler) on SSLCommerz.
- Implemented low-level network communication for the ZKTeco biometric attendance protocol and BDRIS registration relay.

PROFESSIONAL EXPERIENCE (CONTINUED)

Frontend & Extension Lead *Jun 2026 – Sep 2026*

ihateresume • *Bring-your-own-key AI job platform* • *Next.js 15, React 19, TypeScript 5, Chrome MV3, FastAPI, PostgreSQL*

- Directed frontend engineering on a team of 6, delivering the Next.js 15 / React 19 web platform (**19 routes, 165 components**) and Chrome MV3 extension.
- Engineered extension web scraper parsing schema.org JobPosting across 9 job boards plus a custom Workday adapter.
- Built 1-click application autofill compatible with dynamic React and Vue forms; secured client against XSS using DOMPurify and shadow-root isolation.

SELECTED PROJECTS

ContestMate — CP Contest Reminder App *Flutter, Dart, REST APIs, Local Notifications*

github.com/rajesh-1920/contestmate-a-flutter-base-reminder-app • MIT licensed

- Built a cross-platform mobile utility tracking live and upcoming contests across Codeforces, LeetCode, CodeChef, and AtCoder for 100+ university peers.
- Implemented background polling and automated local notifications prior to contest rounds with custom alert windows.

NovaOS — Hobby x86-64 Operating System Kernel *C, NASM, Limine, QEMU, Make*

github.com/rajesh-1920/novaos • MIT licensed

- Engineered a 64-bit kernel entering long mode via Limine, with serial logging, framebuffer console, and interactive shell over PS/2 keyboard and serial.
- Shipped freestanding libc, device drivers, and higher-half linker script; automated hybrid BIOS/UEFI bootable ISO generation from 1 Makefile.

PaperHub — Document-Management Platform *Node.js, Express, MongoDB, Tailwind CSS, Docker*

github.com/rajesh-1920/paperhub • MIT licensed

- Built 3-role RBAC (user, officer, admin) document processing platform with verification workflows and payment tracking on Node/Express and MongoDB.
- Shipped responsive framework-free Tailwind + vanilla-JS frontend; containerized with Docker Compose and automated GitHub Actions CI.

Maze Run — 2D Algorithmic Maze Game *C++, Graph Pathfinding, Game Logic*

github.com/rajesh-1920/Maze-Run-Game • MIT licensed

- Developed a 2D maze game in C++ implementing BFS/DFS graph pathfinding, collision detection, and dynamic obstacle traversal algorithms.

EDUCATION

B.Sc. in Computer Science & Engineering Expected 2027

Patuakhali Science and Technology University (PSTU) — 7th Semester CGPA: 3.41 / 4.00

LEADERSHIP & COMMUNITY

Assistant General Secretary (AGS) — CSE Club, PSTU Feb 2026 – Present

Lead organization of inter- and intra-university programming contests, problem setting, and platform logistics; mentored 100+ junior students in Data Structures, Algorithms, and C++.

Member — CSE Club, PSTU 2022 – 2026

Conducted algorithmic workshops, problem-solving bootcamps, and represented PSTU at national collegiate contests.

CERTIFICATIONS & TRAINING

- Cython – Programming, DSA with C++ and Python — bongoDev (2024)
- BAPS National Programming Camp (Intermediate Track) — BUBT (2025)
- Flutter App Development Training — EDGE Program, PSTU (2024)
